ADVANCED CORPORATE FINANCE
Crafting Strategies to Create Shareholder Value

Sound financial management is an integral component of business strategy. Designing a consistent, cohesive corporate investment and finance strategy can create and sustain a viable competitive edge. Unfortunately, many senior managers are unaware of the linkages between strategic and financial management and do not realize that a strategic vision must be accompanied by the understanding of how it will generate financial value.

The programme on Advanced Corporate Finance helps build understanding of the interactions between a firm’s investment decisions, the business and operational strategies. Through case-studies and interactive discussions, participants gain exposure on how to optimise and integrate investment and financing decisions to maximise shareholder value. The programme is designed so that participants develop a deeper understanding in applying the principles and frameworks of finance and gain greater confidence in making strategic financial decisions.

- Unravel the complexities of financing decisions and tactics & procedures in financial markets
- Measure the impact of financing strategies on firm’s cost of capital
