MODERN RETAIL MANAGEMENT

Retail sector is the second largest employer in Pakistan, employing approximately one-fifth of the total labour force, witnessing tremendous growth over the decade. In last decade, the percentage market share of the modern and traditional retail has increased exponentially. Given the growth trajectory and rising competition, it is essential for retailers to rethink their business models, enhance customer experience and create an operating niche. The leading players in retail industry are expected to be businesses that understand the dynamics of modern retail management, have a clear retail value proposition and are backed by the necessary operations and sourcing mechanism to support it. In all this, information-smart retail management has become the key to competitive advantage.

The essential challenges in retail ecosystem are: know your customer and their preferences, stock-up what they need and when, serve well and do it efficiently, and yet do all of this at a scale that allows you efficiencies in planning, sourcing and management.
