LEVERAGE YOUR TOP TALENT

How can high-potential executives drive results that accelerate performance? With frequent corporate transitions and competitive market shifts, it is critical to unlock the full growth potential in every aspect of the organisation. High-potential executives require exposure to new ways of thinking and new perspectives that can help catapult their career and company’s outlook to the next level.

**Developing Future Leaders (DFL)** by LUMS is an intensive programme designed to offer unique opportunities for the capability development for emerging leaders. DFL also provides an opportunity for progressive organisations to identify high potential talent and enable them to cope with transitional challenges.

DFL provides fast track executives a platform to gain contemporary knowledge and skills, strengthen business fundamentals and transform them into actionable insights.

The programme focuses on developing greater confidence, creativity, resourcefulness, initiative and solutions-finding, and problem-solving capabilities so that participants can operate and perform at a higher strategic level. Over 7 days, the programme instills a whole new way of thinking that allows participants to create their own roadmap for growth.
“The concept of the programme has changed my directions to be an effective leader. An excellent programme for individuals who look forward to bring a change in themselves to become better future leaders.”

ACCELERATING YOUR IMPACT

A unique blend of contemporary knowledge and skills, DFL prepares high-potential, middle-management executives to move from mastery of one focused area to success in a broader role. The participants will get the opportunity to explore individual strengths, increase their understanding of effective leadership and refine strategies for improving personal and organisational performance.

DFL uses a multidimensional approach of lectures, group discussion, case study, role playing, networking opportunities, focused simulation and exercises geared to provide new insights and give participants opportunities to apply them.

Evaluations of preceding years (on a scale of 1-5; 5 being highest) provide a key indicating measure of the programme’s impact on the participants.

OUR LEARNING MODEL

We believe that people learn when they immerse themselves in concrete real life experiences, are able to reflect on their experiences, and extract useful ideas to experiment and apply in future. Real experience has no substitute and the best learning should ideally happen during work. However, little time is available for people to reflect upon their experiences and to synthesise learning into usable ideas while they are acting in real life. Moreover, pressures and stresses of daily work leave no time to experiment with new approaches to maximise learning and create more value.

We at LUMS, therefore, simulate an environment that is as close to real life as possible. We provide participants opportunities for discussion, analysis, and reflection on real life experiences, permitting extraction of, and experimentation with, new ideas. Our unique blend of real life case studies, experiential learning exercises, classroom activities, group work and individual work assignments provide participants a distinctive learning experience.

THE CASE METHOD OF TEACHING IS A SPECIAL STRENGTH OF LUMS

The university is at the forefront in developing and using cases in its various programmes. Cases describe actual business situations and bring into the classroom, problems and opportunities faced by practicing managers. The participants analyse problems, evaluate alternatives and recommend appropriate solutions which help enhance decision-making abilities and problem-solving skills.

PEER GROUP LEARNING IS AN INTEGRAL PART OF THE LEARNING PROCESS

Group study provides a forum where you benefit from the diversity of views, perspectives and abilities of other team members. The dynamic exchange of knowledge and experience among successful individuals from different organisations and functions enhance learning. Our programme also provides excellent networking opportunities.
