PROBLEM SOLVING AND DECISION MAKING

In today's fast-paced corporate setting, managers increasingly face situations that require critical decision-making in an atmosphere of uncertainty and time pressure. Breaking down a problem and assessing the outcomes of different options is neither simple nor straightforward. High-quality decisions are essential for strong business performance, but only a few people are trained to make good decisions consistently, with clarity and confidence.

Using a unique blend of case studies, role-plays, and experiential exercises, the 4-day experiential programme provides an unparalleled opportunity to acquire skills and techniques essential for making high-quality decisions and solving problems effectively. Participants will build competencies by learning how to work on the right problem, develop and structure objectives, understand the consequences, and make appropriate trade-offs using several problems solving and decision-making tools.

BENEFITS

During the programme, the participants will develop an understanding of;

- Essentials of rational decision making
- Decision analysis procedures in resolving problems
- Analytical frameworks for framing problems and weighing alternatives
- Breaking down complex decisions into manageable parts and analysing possible alternatives for making rational trade-offs
- Dynamics of group decision making
- Leading the decision-making process and building collaboration with multiple stakeholders
- How moral principles and ethical considerations impact decision making

Programme Date:	August 15 - 18, 2024
Programme Fee:	PKR 160,000
Residential Fee:	PKR 75,000
Venue:	Rausing Executive Development Centre, LUMS

WHO SHOULD ATTEND

The programme is aimed at middle-level managers having 3 - 8 years of experience with responsibilities for decision making and problem solving.

“The planning and sequencing of the sessions were done perfectly. It builds a story around different tools and techniques for problem-solving and decision making. The experience-based learning in which each session forces you to implement and apply your learning right there which solidifies the conceptual knowledge.”
