# ADVANCED CORPORATE FINANCE

## *Crafting Strategies to Create Shareholder Value*

Sound financial management is an integral component of business strategy. Designing a consistent, cohesive corporate investment and finance strategy can create and sustain a viable competitive edge. Unfortunately, many senior managers are unaware of the linkages between strategic and financial management and do not realise that a strategic vision must be accompanied by an understanding of how it will generate financial value.

The programme on **Advanced Corporate Finance: Crafting Strategies to Create Shareholder Value** helps build an understanding of the interactions between a firm's investment decisions, the business and operational strategies. Through case studies and interactive discussions, participants gain exposure on how to optimise and integrate investment and financing decisions to maximise shareholder value. The programme is designed so that participants develop a deeper understanding of applying the principles and frameworks of finance and gain greater confidence in making strategic financial decisions.

- Unravel the complexities of financing decisions and tactics and procedures in financial markets
- Measure the impact of financing strategies on a firm's cost of capital
