PROBLEM SOLVING AND DECISION MAKING

UPCOMING OFFERINGS

July 14 - 17, 2026

November 10 - 13, 2026

PROBLEM SOLVING AND DECISION MAKING

In today's fast-paced corporate environment, managers face critical decision-making scenarios amidst uncertainty and time pressure. Breaking down a problem and assessing the outcomes of different options is neither simple nor straightforward. Given the complexities, fostering innovative and high-quality problem-solving and decision-making is becoming inevitable for solid business performance and longevity.

This 4-day experiential programme will use a unique blend of case studies, role-plays, and experiential exercises to equip the participants with essential skills and techniques for high-quality decision-making and problem-solving. The hands-on approach will enable them to develop competencies in tackling complex problems, structuring objectives, understanding consequences, and making informed trade-offs. The programme will ensure participants are adept at leveraging a user-centred approach and artificial intelligence for data analysis and predictive insights, leading them to make more informed and effective decisions.

WHO SHOULD ATTEND

The programme is designed for middle-level managers responsible for decision-making and problem-solving.

"The planning and sequencing of the sessions were done perfectly. It builds a story around different tools and techniques for problem-solving and decision making. The experience-based learning in which each session forces you to implement and apply your learning right there which solidifies the conceptual knowledge."
